**Stone-Crete™ is an affordable alternative to stone that has revolutionized the construction industry**

**Stone-Crete™** is ideal for large highway projects such as sound barrier walls, subdivision entryways and retaining walls, and is perfect for a variety of commercial and residential jobs. **Stone-Crete™** also can be used in mall entrances, bridges, and dams. Residential uses include privacy walls, landscaping, and exterior foundation walls.

**Stone-Crete's™ patented coloring system offers flexibility of design**

**Stone-Crete™** utilizes a unique and exclusive two-part coloring process offering an unlimited palette of colors that compliment and blend with any project's design specifications, giving the architect, specifier and designer the freedom to match other parts of the construction and landscaping project, while maintaining the same technical specifications as masonry work.

"Acadiana's Decorative Concrete Specialists"

**Re-usable Formliners**

**Stone-Crete™** formliners are molded from natural stone surfaces and are manufactured in both a high and low re-use urethane material designed to withstand the rigors of on-site construction under a variety of extreme weather conditions.

Available with straight wall, corner, and corner post configurations, with an assortment of filler sizes, **Stone-Crete™** liners are designed to mount to standard 2' x 6' concrete forms with 360° compatibility creating a non-repeating pattern.

**Factory Training, Technical and Marketing Support**

Increte Systems provides factory training, toll-free technical support, as well as marketing support to insure product and customer satisfaction.

The Trained Contractor Certificate indicates certain employees of the company have been instructed in the proper application of INCRETE Systems Products and have received copies of the INCRETE Systems Application Instructions and Specifications. The Trained Contractor Program is not an apprenticeship. Each trained contractor is an independent company and bears responsibility for its own workmanship. INCRETE Systems, Inc. assumes no liability for the workmanship of a trained contractor.

Consider the family of INCRETE Systems products for your next architectural concrete application:

- Increte • Spray-Deck • Texture-Crete
- Stain-Crete • Color-Crete

# Stone-Crete™

**Cast-in-Place Architectural Wall System**  
**"The Future of Vertical Pours"**

# Stone-Crete™

Cast-in-Place Architectural Wall System

**Stone-Crete™** is a patented cast-in-place architectural concrete wall system that delivers the beauty of natural stone and the strength of concrete at a fraction of the cost of natural materials.

**Stone-Crete™** can be utilized as a structural wall for both residential and commercial applications from retaining and foundation walls to highway sound barrier and subdivision entry walls.

**Stone-Crete's™** deep relief texture and patented coloring process allow it to meet a virtually endless variety of design specifications and since it's a cast-in-place system, it can be installed in a fraction of the time and is free from the inherent maintenance issues of veneers or natural materials.

With **Stone-Crete™** you can let your imagination be your guide.

**Stone-Crete™**, the beauty of natural stone, the strength of concrete, the future of vertical pours.

## Bridges, Dams, and Commercial Structures...

### Desired Strength Can Be Achieved For Use As Structural Walls

**Stone-Crete™** is ideal for highway projects, sound barrier walls, structural retaining walls and subdivision entryways as well as bridges and dams, privacy walls, landscaping and exterior foundation walls.

**Stone-Crete™** is also gaining widespread use in renovation of historical districts. Old natural stone structures can be updated or replaced without losing their historic appearance.

### Ideal For Bridges, Dams, Large Highway Projects

Top, Stone-Crete was chosen for this bridge abutment in Tyler, Texas. Top right, the City of Sweetwater, California chose the river rock pattern for its pleasing aesthetics for the pipe encasement in their reservoir system. Below, the Sedona pattern was selected for a bridge in Wyoming's Guernsey National Park. Bottom, the River Rock pattern was chosen for this exclusive golf course community's bridge.

# Stone-Crete™

Cast-in-Place Architectural Wall System

## The wall system that's as Functional as it is beautiful!

The *Stone-Crete*™ patented concrete wall system is as functional as it is beautiful and durable with its structural capabilities, these golf course retaining walls, located in Pennsylvania, offer the beauty of a natural hand laid stone wall with the functionality of a structural retaining wall.

## Speed of Installation

*Stone-Crete*™ cast-in-place technology allows it to be installed in a fraction of the time of natural materials or veneers, and requires no maintenance.

## Low Maintenance, Unmatched Durability

*Stone-Crete*™ gives the appearance of massive solidity without added structural weight. Right, This beautiful dry stack wall is featured on the grounds of the *Better Homes and Gardens* Concrete Home showcased in the August 1997 "Small Wonder" feature article.

## Affordable Alternative

The *Stone-Crete*™ patented concrete wall system delivers the beauty of stone at an affordable cost for this ecological park in Japan.

## Private Elegance

These stunning privacy walls offer the beauty of natural stone in the river rock pattern below, in St. Croix, The Virgin Islands and top, in the Dry Stack pattern in Albany, New York. The attention to detail and realistic aesthetic features make *Stone-Crete*™ truly a "one of a kind" wall system.

# Stone-Crete™

Cast-in-Place Architectural Wall System

## Reusable Form Liners

**Stone-Crete™** form liners are designed to be mounted on traditional concrete wall forming systems. Molded from natural rock surfaces, the form liners are made of a highly durable urethane for multiple concrete pours.

## Custom Color Matching

**Stone-Crete™** utilizes unique and exclusive patented coloring processes that deliver unmatched realism and durability.

**Stone-Crete™** also offers custom color matching to any project specifications.

## Stone-Crete™ Is Perfect For Foundation and Building Walls

**Stone-Crete™** combines the strength and durability of a solid concrete foundation wall with the beauty of hand laid stone. These pump houses in Long Grove, Illinois are constructed entirely of **Stone-Crete™** in conjunction with an ICF system.

## Many Benefits

Builders architects and engineers like **Stone-Crete's™** affordable cost, zero maintenance, reusable form liners, and speed of installation, as well as, its unique aesthetic features.
